

Condition 37	APCD Off-Site Mitigation Program
<p>APCD and the County will establish an off-site mitigation program based on the ozone precursor, PM exceedence, and greenhouse gas emissions. The County may use the funding of this program to implement APCD approved emission reduction projects near the project site or may pay that funding level plus a 15 percent administration fee to the APCD for the APCD to implement emission reduction projects in close proximity to the project. The County will provide the funding at a time or schedule approved by the APCD to help facilitate emission offsets that are as timely.</p>	
<p>Evidence of compliance: The County and APCD have been working together to track emissions as a result of the project and have paid a yearly fee based on actual emissions. The first four quarters resulted in a fee of 155,972.20, which included the 15% administration fee. Tracking emissions will be on-going throughout the remainder of the project.</p>	

Condition Satisfied
